

Ease of operation is the name of the game with all functions being electronically controlled by thumb positioning on the patented tow handle. Close your eyes. This can't be real! There just has to be a tournament boat in front of you. This baby has the power to perform! The 70HP jet pump, axial flow engine can tear up the water like no other. Speed, torque and EPA compliance all in an engine more quiet than most conventional two stroke engines. No matter how you ski, SOLO will pull you. . .in more ways than one!

The safety shutoff switch is built right into the handle so when you let go or fall the engine shuts down fast and brings your SOLO to a quick stop. A bright orange flag is up all the time to ensure that others will see you, whether you're up or down.

So go ahead and leave the others on the beach. You have our permission.

SPECIFICATIONS

Material: Fiberglass/Molded Plastic
Length: 94.5"
Width: 41.5"
Height: 29"
Weight: 375 lbs
Engine Type: 3 cylinder, 2 stroke
Displacement: 683 cc
Rated Power: 70 HP
Propulsion: Jet Pump, Axial Flow
Automatic Bilge: Constant Siphon
Fuel/Oil Mix: 50:1
Fuel Tank Capacity: 8 U.S. Gallons
